

Saddle Pad Washing Instructions

Pad

- If pad is wet from sweat, allow pad and inserts to air dry before attempting removal of inserts.
- Curry comb the bottom felt layer prior to washing. (We recommend Oster's Rubber Curry Comb with fine teeth.) **DO NOT USE A WIRE OR METAL CURRY COMB!** (It will tear the felt.)
- Remove the ConforPedic™ impact reduction material inserts by curling into a “U” shape.
- Drop the pad in your home washing machine.
- Wash with cold water on knit/delicate gentle cycle for no more than 6-10 minutes. Felt side must be away from agitator. The agitator should not move or move very slowly in this cycle. **DO NOT PRESOAK. Hand wash if you do not have this cycle (Hand washing is recommended).**
- Use a liquid detergent like EQ Solutions Soil Release or Woolite. Some have found that Pert Happy Medium Shampoo works well also.
- Air dry or tumble dry at lowest setting.

ConforPedic™ Inserts

- Remove inserts from the pad.
- Soak or rinse in plain water or a baking soda and water solution to remove odors.
- Place inserts on a towel and press down to remove excess water. **Do not twist or roll inserts when they are wet! Do not hang over a line to dry.** Allow to air dry on towel. You can also place the inserts on an inclined flat surface and use a rolling pin to squeeze the water from the inserts.
