

Saddle Pad Usage Instructions

- Place pad on horse.
- Place saddle on pad ensuring that inserts are centered under saddle bars.
- Tighten girth/cinch.
- **CAUTION!** The ConforPedic™ inserts are temperature sensitive! They will be hard when it is cold and soft when it is warm. As your horse's body heat warms the inserts, they will become softer and compress more.
- It is suggested that you ground school your horse or allow the pad to sit for a couple of minutes before getting on.
- **CAUTION!** Check to see if you need to re-tighten girth/cinch prior to mounting!
- Mount horse and walk or trot.
- **CAUTION!** Check to see if you need to re-tighten girth/cinch again and as necessary!
- Curry comb periodically to break up salts and restore nap when the pad is dry. (We recommend Oster's Rubber Curry Comb with fine teeth.)
- **Enjoy!**
